

A photograph of a wind farm at sunset. The sky is a mix of blue, orange, and pink. Several white wind turbines are visible, with the largest one in the foreground on the right. The word "GREENPEACE" is written in a green, stylized font inside a white rectangular box on the left side of the image.

GREENPEACE

Hurricane Michael

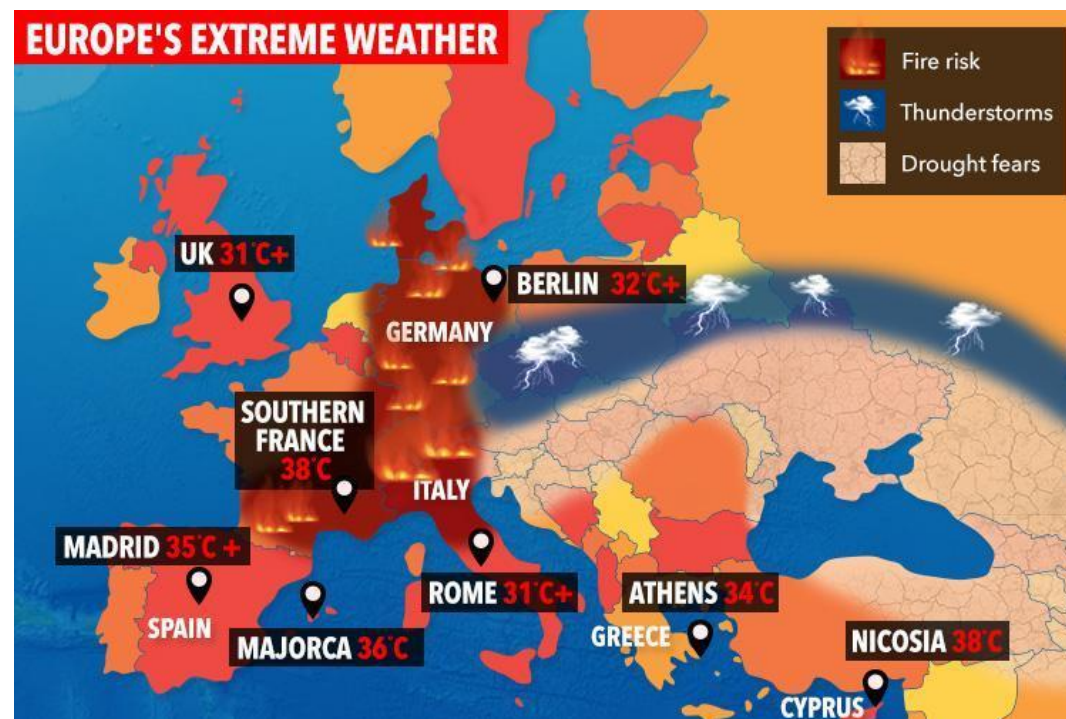

Forest fires

Super Typhoon Mangkhut

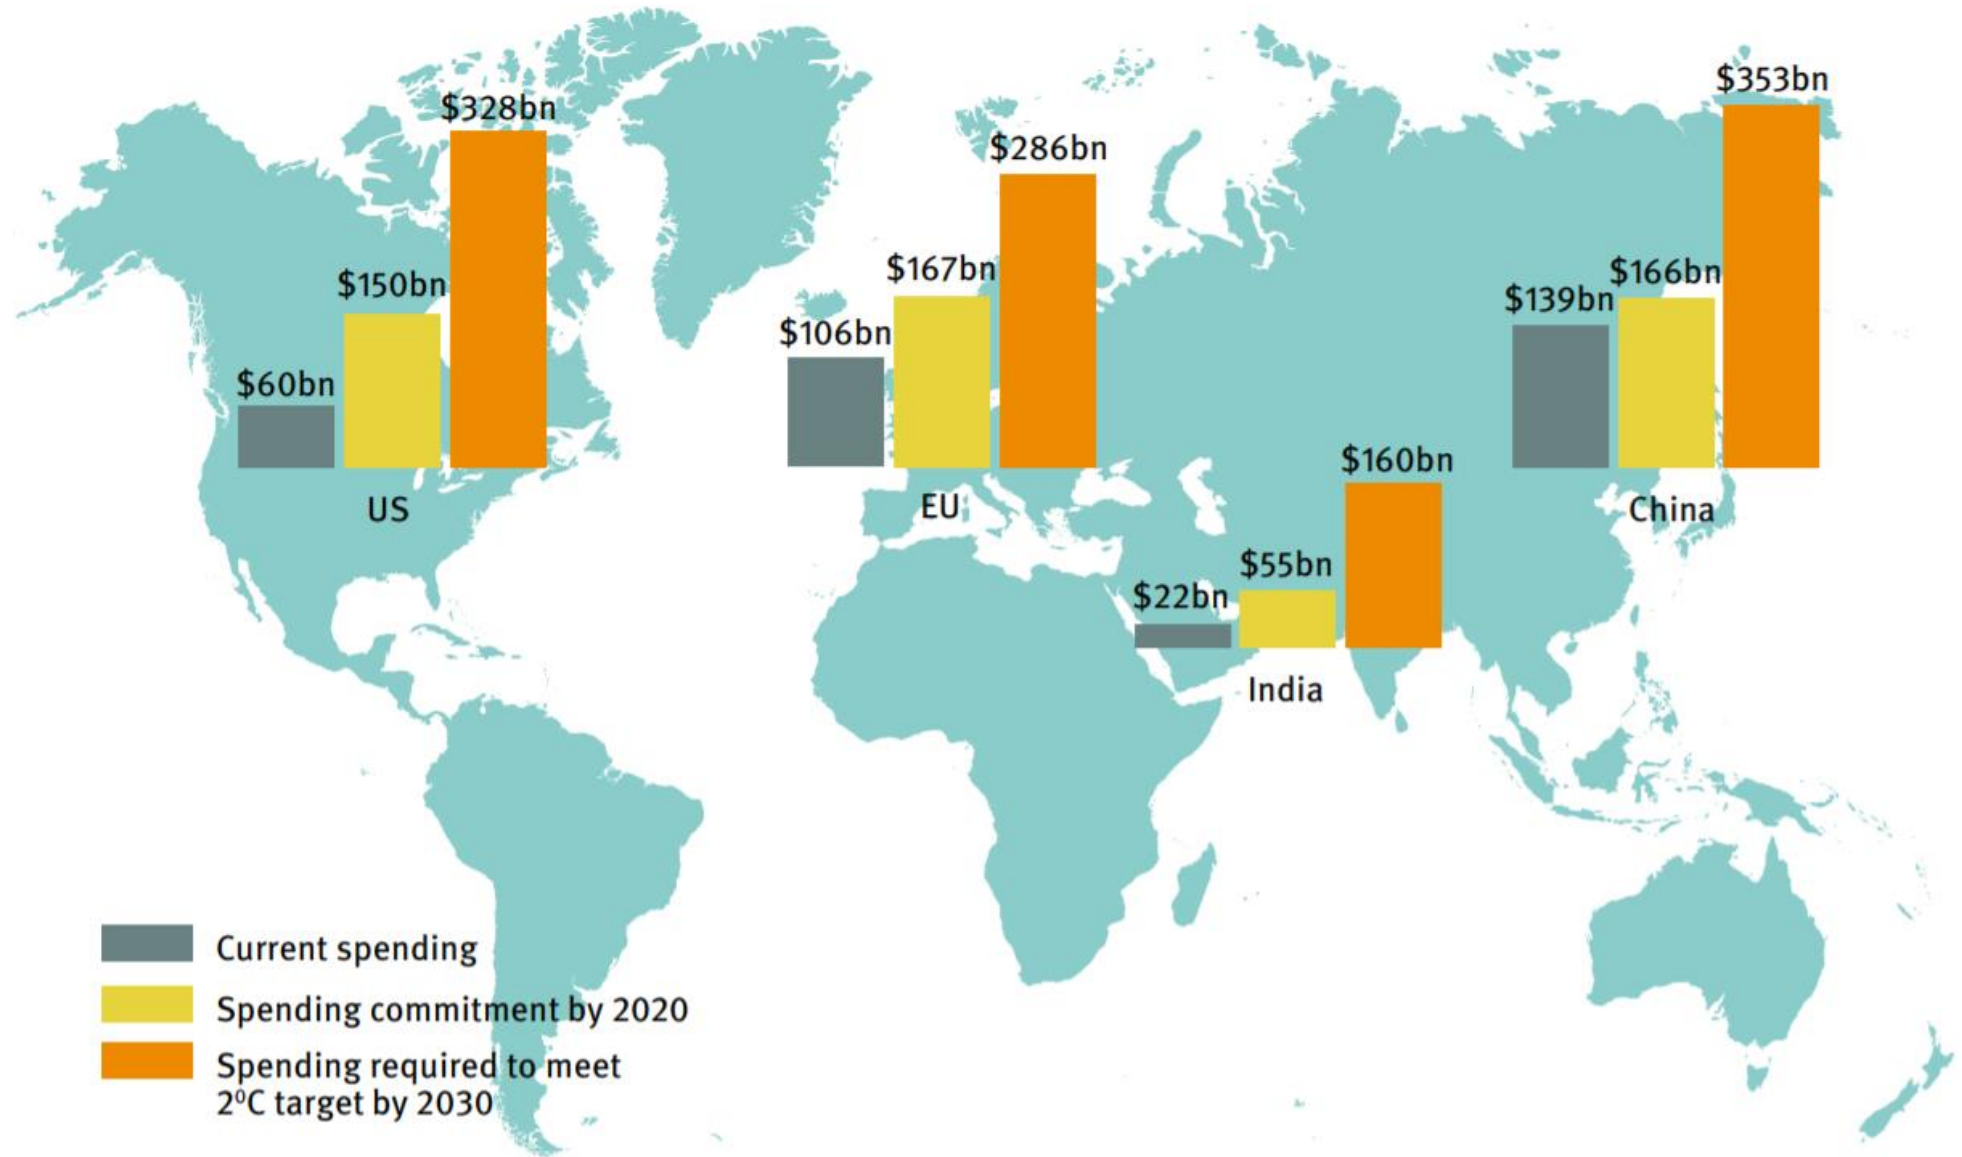

Flooding across the UK

Drought

Projected investment to 2030 in low carbon generation, energy efficiency and CCS by the UK's major trading partners⁶

**NET ZERO
EMISSIONS
BY 2050**

Claire Perry UK COP 26 President

Local action on the ground

- 1) Set measurable targets to achieve net zero and meet nature restoration goals
- 2) Ensure that voices of the most vulnerable communities are represented in council decision-making – including exploring the use of representative Citizen Assemblies/Citizen's Juries
- 3) Use legal and planning mechanisms such as Section 106 agreements to fund climate actions and nature restoration projects
- 4) Retrofit council-owned properties with high levels of insulation & enforce building standards
- 5) Install Electric Vehicle (EV) charging points
- 6) Prioritise transport investment into cycling, walking, trams and public transport, such as electric buses
- 7) Identify areas suitable for renewable energy in the local plan
- 8) Switch street lighting to well-designed and well directed LED lights
- 9) Adopt circular economy waste policies in relevant plans and contracts
- 10) Double tree cover on council-owned land

Leveraging local authority pressure for national action

- Call for at least 5% public spending per year on the climate and nature emergency - and talk about the public health and social benefits of acting now!
- Push for genuinely transformative leadership at COP26
- Call for new cars and vans with petrol and diesel engines to be banned by 2030
- Start talking about the need for a shift in diets & call for a boost in support for public procurement in schools, hospitals and prisons across the UK to increase access to locally-sourced, plant based food
- Call for a Frequent Flier Levy
- Work with unions and other local stakeholders to increase protection for workers in new low carbon sectors, and to push for a national just transition strategy that has sufficient funds and powers
